

Robert Lyn Nelson's "Visions of Paradise"

L'Art Pour la Table™

Robert Lyn Nelson was the first fine artist to focus on marine life incorporating the "two worlds" image which has been so widely imitated. The detail of his "underwaterscapes" come alive with the color of exotic fishes, plantlife and natural light. You can almost hear the whale songs or glimpse the giant sea turtle as it glides through the water.

We are extremely gratified that Nelson has granted us exclusive rights to reproduce his famous triptych works on our high quality, hard cover, cork-back place mats and coasters.

The "Visions of Paradise" collection consists of:

#9501 "Windows of the Sea" Place Mats (4)
